3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 15-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fidago.

As applied to claims 15-20, it would have been obvious to one having skill in the art to incorporate the use of particular materials as recited in these claims since it was known in the art that selecting a material from a host of group of available materials on the basis of its suitability for the intended use as a matter of obvious design choice.

Limitations of claims 16-20 are similar to that as discussed above.

As applied to claims 21-23, it would have been an obvious matter of design choice to choose any desired means for connection between the connection pads of the antenna and the conductive pads of the module including the use of grease charged, silicon gasket charged, and/or additional gold deposited by thermal compression since applicant has not disclosed that these features are critical, patentably distinguishing features and it appears that the invention would perform equally well with the conventional bonding techniques as taught by each of the prior art reference ( i.e., see the discussion of Fidago at cols. 5-6).

### ***Response to Arguments***

5. Applicant's arguments filed 2/12/07 have been acknowledged.

***Allowable Subject Matter***

6. Claims 4, 13 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Prior art references are cited for their teaching of method of manufacturing chip card or smart card devices.
